

Minoo Fars Food Industries

Natural products of Mino Fars food industry

The production technology of natural products (dates, berries, grapes, etc.) in this factory is completely advanced and up-to-date. As a result, the manufactured products are of higher quality than the products produced in traditional workshops.

Due to their high therapeutic properties, juices have long found a special place in the diet of Iranians. In addition to the production of date juice, date liquid sugar and date honey nectar, this company has other diverse products such as fig juice, berry juice, three juices and four juices which are a combination of grape juice, date juice, berry juice and fig juice.

Introduction

IMino Fars Food Industry Company was registered in 2007 and put into operation in 2010 with the aim of producing all kinds of natural date sugar products and its derivatives.

In order to improve the society's diet and use natural sugar instead of artificial sweeteners, this company has tried to produce health-oriented products with natural sweetness. In this regard, it has produced and sold date liquid sugar, date concentrate, date juice and animal feed powder.

Also, in the snack production sector, since 2013, it has produced and marketed well-known and high-quality products, namely popcorn and salt puffs. The crunchy and biscuit production line is now being launched and added to the company's product portfolio.

950*580 mm	Barrel	250 Kg

● Date liquid sugar

Date oil sugar of Mino Fars Food Industry Company is a completely natural product without additives and preservatives. Consumers can use these concentrated sugars in breakfast, snacks, sweetening tea and Nescafe, syrup, preparing various types of cakes, sweets, etc. Also, this product is a refined syrup, which is a mixture of different types of sugar, namely glucose and fructose, with 71 to 74 degrees Brix, with a completely clear appearance and light yellow color. Liquid palm sugar is used in soft drinks, chocolate, ice cream, marmalade, candies and also in confectioneries.

Note that the crystallization in this product is due to its high purity. And if this happens, the product will return to its original state at a temperature of 40-50 degrees Celsius. By keeping in a dry and cool place away from direct sunlight, this tonic and invigorating product will have a shelf life of at least 12 months. If used in healthy drinks, it retains its beneficial properties.

Date liquid sugar has a high percentage of fructose and very low sucrose and also contains minerals and vitamins. Perhaps it is better to say this, by adding the right amount of this substance to the diet, it needs less multivitamins.

This healthy and tasty product is obtained by processing premium and fresh dates, which are produced using advanced machinery and equipment, and are marketed for consumption. Liquid date sugar does not need to be stored in the refrigerator, and should only be stored in a cool, dry place away from direct sunlight.

Date Honey

● Date honey

Date honey shares similar compounds with traditional honey and offers a healthy and more affordable alternative. When combined with cream and butter, date honey makes for a nutritious breakfast option for families. The production process involves refining date syrup, removing its impurities and reducing it to a thick, honey-like liquid. Date honey essentially encapsulates all the nutritional elements found in dates.

Here are some of the product's features and benefits:

- Date honey is a highly energizing food, capable of providing all the nutritional benefits of dates when the body requires extra energy.
- It shares the same health benefits as dates.
- It contains essential nutrients such as phosphorus, iron, protein, carbohydrates, and is rich in energy.
- It is considered one of the healthiest dietary options available.
- This product is made from premium dates sourced from the finest date palm plantations in Iran.

● Date vinegar

Minoo Food Industries produces date vinegar using the finest Iranian dates, without the addition of artificial colors or preservatives. This product is commonly used as a seasoning for various dishes and salads, enhancing the flavor of meats as well.

Its dark and glossy brown color adds a unique touch to your meals. Date vinegar not only brings its natural flavor but also carries the health benefits of dates. By preventing the accumulation of lactic acid in muscles, date vinegar reduces fatigue and muscle stiffness, making it highly beneficial for athletes.

One of the most significant advantages of this condiment, which has been used as an ancient remedy for thousands of years, is that it doesn't pose a problem for individuals with stomach ulcers.

Date Syrup Tahini

● Date syrup tahini

Date syrup tahini, produced by Minoo Food Industries in Fars, is a nutritious and energizing product made by combining date syrup and tahini using advanced technology. It serves as a wholesome breakfast option or a high-energy snack. Additionally, it can provide a portion of the daily energy needs for athletes and children.

This product is rich in essential minerals such as magnesium, phosphorus, and iron, making it effective in combating anemia and revitalizing nerve cells. It helps alleviate fatigue, general weakness, and prevents anemia.

With a shelf life of 9 months, it doesn't require refrigeration, but should be stored in a cool, dry place away from direct sunlight

Date kernel

Dimention	number in the box	Weight
		
75*35 cm	Bag	40 Gram

About

Due to their economic viability and cost-effectiveness compared to imported feed ingredients, date kernels serve as an excellent source of vitamins and energy, contributing to increased milk production in dairy cattle. This product stands as a suitable alternative to corn and soy in the feed of meat-producing animals, dairy cows, and egg-laying poultry. Below are some of the nutritional benefits and properties of date kernels for livestock and poultry feed:

- Rich Source of Protein
- Energy Booster
- Dietary Fiber Provider
- Enhancement of Meat and Milk Quality in Livestock
- Improved Palatability in Poultry Rations
- Enhanced Quality of Finished Feed
- Reduction in the Final Cost of Animal Feed

● Date Syrup

Date Syrup is another health-oriented product derived from premium-quality dates. The production process for Date Syrup at our company is fully advanced and mechanized, and no additives are added to the product. It is provided to consumers in a completely sterile form. When stored in a dry, cool place, away from direct sunlight, the shelf life of this product is 12 months.

Date Syrup is rich in phosphorus and iron, making it effective in preventing anemia, alleviating rheumatic pain, reducing arterial and venous diseases, and more.

This product is essentially a syrup extracted from dates, with large particles and solid materials separated, and after filtration and concentration for consumption, it is packaged. All production stages are carried out under strict hygiene conditions and are sterile. The thick and smooth Date Syrup obtained through this process has significant advantages over traditionally produced date syrups.

Many consumers are accustomed to consuming Date Syrup along with cream after meals as a snack. However, it is highly recommended to consume this syrup for breakfast as well, as it activates nerve cells and increases energy.

656*376*318 mm	20	110 g
650*370*310 mm	30	60 g

● Salty Puffy Snacks

Minoo was a pioneer in introducing various products to the Iranian market, including salty puffy snacks. Ali Khosroshahi, the founder of the Minoo Industrial Group in 1959, became familiar with a product from the American company Beatrice Foods during his travels. Later, he introduced this product to the Iranian market under the name 'Salty Puffy Snacks'.

Minoo's salty puffy snacks has retained its nostalgic flavor and is now more colorful and appetizing than ever with a tantalizing mix of salt and cheese powder.

To produce salty puffy snacks, corn kernels are expanded inside an extruder, and after passing through a dryer, they are coated with a mixture of vegetable oil, cheese powder, and other suitable flavorings. This results in a delicious snack with an appealing color and the perfect amount of salt seasoning.v

Richi

Each share is 30 gr

Energy: 145 kcal

656*376*318 mm	20	110 g
650*370*310 mm	30	60 g

● Snack Richi

Among the junk foods, 'Crunchy' can be introduced as a nutritious snack for all ages. Mino Snack Crunchy is launched under the Richi brand. This product comes in various flavors to suit all tastes and accompanies you at home or gatherings. The base ingredient of crunchy is cornmeal just like a cheese snack. Cornmeal bulks up under heat and pressure after passing through special extruders along with moisture. It then becomes completely crispy after passing through a hot oil drum in the shortest possible time and going through a specialized oil extraction system. In the powder coating tank, the snacks are coated with spicy, cheesy, and delicious new garlic butter (barbecue) flavors. Following, they are directed to the packaging section in the weights of 52 and 90-gr and packed into cartons. This product is immediately sent to the warehouse for loading and delivery to the distribution company.
